Andrew Johnson

Senior Software Engineer

PROFILE

Senior Software Engineer specializing in scalable full-stack web applications using TypeScript, JavaScript, React, Next.js, Node.js, and Python. Led high-impact products at Apple and early-stage startups, leveraging LLM-assisted workflows using tools such as Cursor, Codex, and Claude Code.

SKILLS

TypeScript, JavaScript, Python, PHP, HTML, CSS; React, Next.js, Node.js, Tailwind CSS, MongoDB, Supabase; REST APIs; LLM-assisted development (Cursor, Codex, Claude Code), OpenAI APIs; CI/CD (GitHub Actions, Vercel), Docker & Docker Compose; Test Automation (Jest, pytest), Splunk; YAML, Markdown

EXPERIENCE

Consulting / Contract Work

Senior Software Engineer (May 2025 – Present)

- Completed short-term consulting and contract work for early-stage startups, building proof of concept demos and features for web applications.

Virtue AI, San Francisco, CA

Senior Software Engineer (February 2025 – April 2025)

- Led the rebuild of the LLM Red Teaming web client into a scalable modern application using Next.js, improving user experience and maintainability.

Small Business Chatbot / Search That Song, San Mateo, CA

Senior Software Engineer (June 2024 – February 2025)

- Built full-stack applications leveraging React, Python, MongoDB, and OpenAI APIs.
- Developed AI-driven features for customer support chatbots and music discovery.

AI Stealth Startup, San Francisco Bay Area

Senior Software Engineer (October 2023 – May 2024)

- Developed a comprehensive discovery and distribution platform using Next.js and React tailored for open-source Large Language Models (LLMs), facilitating increased accessibility and adoption.

Apple Inc., Cupertino, CA

Senior Software Engineer, iCloud, Apple.com/jobs, Internal Web (March 2006 – December 2018)

- Designed and shipped high-profile products including iCloud Webmail, Webmail AddressBook, iCloud Autocomplete, Mail Drop, and Apple.com/jobs.
- Championed UI/UX design initiatives, emphasizing intuitive interfaces and robust functionality across both MobileMe Webmail and various internal frameworks using SproutCore JS.
- Implemented critical cybersecurity measures, notably in HTML email sanitization, significantly reducing vulnerabilities to XSS attacks. Leveraged Splunk analytics for proactive monitoring, performance optimization, and quality assurance.
- Designed and shipped internal Apple websites (HRWeb, Wellness) using JavaScript, PHP, and CodeIgniter; built and maintained Apple's internal content management system (Cascade CMS)

Franklin Templeton, San Mateo, CA**Software Engineer (June 2001 – March 2006)**

- Developed Interwoven TeamSite Content Management System for content publishing to broker and shareholder websites.
- Engineered template modules using Perl and XML, conducted site testing, managed Bugzilla for issue tracking, and facilitated comprehensive technical analysis and user training.

EDUCATION**University Of San Francisco**

Bachelor of Science, Information Systems June 2004
